THERMALLY MODIFIED WOOD

**NEW!**

Call For Availability

Ash Arbor Wood Siding - Bismarck, North Dakota

## Where Innovation Meets Beauty

Advantage Lumber finish mills Arbor Wood thermally modified wood for a variety of outdoor and indoor applications including siding, decking, and dimensional lumber. Our process begins with a select grade of domestically grown and responsibly harvested timber which undergoes a thermal modification process using heat and steam. The result is a high-quality, performance-driven material which sustains the natural beauty and design element of wood all without the use of harsh chemicals.

USE PHONE CAMERA TO  
SHOP ARBOR WOOD

### SOLID & STABLE

Dimensional stability is increased as expansion and contraction is reduced by up to 60%.

### ENHANCED APPEARANCE

Thermally modified wood will have richer tones that extend throughout the entire thickness of each board.

### ULTIMATE WORKABILITY

Arbor Wood may be glued, painted, or finished similar to standard wood to achieve the desired look for your next project.

### LIGHTER WEIGHT

A significantly lower moisture content reduces the physical weight of each board for easier handling and installation.

### DECAY RESISTANT

Less water absorption makes it less susceptible to mold, rot & fungal decay.

### CHEMICAL FREE

The thermal modification process uses nothing but heat and steam.

Ash Arbor Wood Siding - Sunfish Lake, Minnesota

Arbor Wood Ash Decking - Lakeview Colorado Residence

## Products & Applications

Thermally modified wood can be used in an array of commercial and residential applications. Popular applications are in external environments where moisture and humidity would compromise a lesser-grade material.

### DECKING

Arbor Wood decking is available in a range of species and profile options. Arbor Wood proves to be a more natural and durable alternative to chemically-preserved lumber.

### SIDING

Arbor Wood siding is produced from domestically sourced and responsibly harvested wood. Arbor Wood is produced from a range of wood species, profile and finish options, including our take on traditional Japanese charred cladding.

### DIMENSIONAL LUMBER

From windows and doors to interior flooring and even landscape furnishings, Arbor Wood is available in a range of profiles to allow for a higher performance natural wood alternative.

Teak Gate - Rancho Cucamonga, California

## PLANTATION TEAK Truly Renewable, Beautiful Decking

Teak (*Tectona grandis*) is found all over the world, in southeast Asia, the East Indies, Africa, and Central/South America. Our Teak is grown in 20-50 year plantations, which means you'll get the hardest, most durable wood while benefiting the environment. Teak is lighter than Ipe in both color and weight. Its color ranges from yellow brown to dark golden brown, darkening with age. Many people seek out genuine Teak Decking, as some companies try to pawn off lesser quality woods (such as Afrormosia) as Genuine Teak when it's not even related. When in doubt, the lumber world refers to the botanical Latin name which is *Tectona grandis*. All of the teak we sell is of the *Tectona grandis* species.

Ipe Decking w/Ipe Rainscreen Planters, Columns, & Entry Door - Western New York

## IPE DECKING The World's Best Decking

Advantage Ipe™ (Brazilian Walnut) is the finest-quality hardwood available, setting the standard for high-end, long-lasting decking worldwide. Its heartwood is a rich, deep brown to dark tan with lighter or darker streaks throughout the grain.

MATERIAL PROPERTIES

LIFESPAN up to 75+ years

BENDING STRENGTH 22,560 psi

HARDNESS 3,680 lbs

Ipe Soffits & Posts - Sarasota, Florida

Ipe Outdoor Kitchen - Sarasota, Florida

Cumaru Deck Tiles & Siding - Baltimore, Maryland

## CUMARU DECKING Resilient Decking For All Environments

Advantage Cumaru™ (Brazilian Teak) is an incredible, low-maintenance hardwood that offers a beautiful array of amber-red to golden-honey colors.

MATERIAL PROPERTIES

LIFESPAN up to 50+ years

BENDING STRENGTH 14,793 psi

Modern Narrow (4") Brazilian Redwood Deck - Williamsville, New York

## BRAZILIAN REDWOOD Outperforms Traditional Redwood

Advantage Brazilian Redwood™ (Massaranduba) bears the distinction of being one of the most beautiful woods in the world featuring shades of burnt sienna. It is also one of the most abundant hardwood species in South America.

MATERIAL PROPERTIES

LIFESPAN up to 30+ years

BENDING STRENGTH 27,280 psi

HARDNESS 3,190 lbs

Brazilian Redwood Shiplap Sliding Garage - Tallahassee, Florida

Brazilian Redwood Deck - Weston, Florida

Garapa Rainscreen Siding - Sarasota, Florida

## GARAPA DECKING Perfect For Your Next Project

Advantage Garapa™ (Brazilian Ash) glows with a light-gold to honey hue and features a fine grain. Like most of our exotic hardwood decking options, Garapa is a photosensitive wood, meaning its color changes when exposed to light. This means Garapa will mature to a rich brownish color over time, making it a great alternative to Ipe or Cumaru in outdoor projects.

MATERIAL PROPERTIES

LIFESPAN up to 30+ years

BENDING STRENGTH 12,900 psi

HARDNESS 1,650 lbs

SHOP WALLABA

Sandura Wallaba Shingles - Georgia Estate

## The Most Dense & Natural Hardwood Shingles

Wallaba is an extremely dense and durable hardwood species native to the forests of Guyana. This hardwood makes the finest wood siding and roof shakes, with a coarse, straight-grained texture. The extreme density provides many benefits over cedar such as higher resistance to wind, cupping, mold/algae formation, and hail damage, all with that rich hardwood look. Wallaba contains high levels of gum exudates and oily resin, which help it resist insect attacks and decay. This amazing hardwood does not require oiling like cedar does, and yet still provides an amazing lifespan. Wallaba will weather to a rich and luxurious silver gray like Teak does on a yacht.

Sandura<sup>®</sup> Wallaba Shingles - NOW IN STOCK!

## Sandura<sup>®</sup> Wallaba Shingles vs. Western Red Cedar Shingles

Category	Wallaba	Western Red Cedar
<b>Hardness</b>	2,050 lb	350 lb
